

BLOW THEM RASCALS OUT

Recently I saw a lady on one of the talk shows remark that we needed some one with some dynamite to blow Congress out of the Capital. I thought a lot about her statement as I watched a lot of the members questioned about the Health Care Reform Bill. The more members I watched the more I agreed with her. Whether you are or for or against the Reform of Health in this Country the more I agreed with this lady. Every member I saw showed me how they should have been on some fishing hole on Beouf River and not in the Hallowed Halls of Congress. And the President should have been baiting their hooks. They all were either stupid, ignorant or some of both. Had they been members of a tenth grade civics class in the school where I was Principal all would have failed. They all (including the President) lied through their teeth. None knew anything about the subject they were discussing or misinforming the listeners and viewers. Naturally the viewers knew nothing about it because the places they were getting information knew nothing. That is not so bad because the voters back home were sending people to Washington who turned out to be failures. That made the voters back home failures. What a mess we have. The best thing to do is what one State out West did a few years back and that was clean out the whole mess starting with the lowest elected official. I am sorry I forgot the State but the State was named so fast I missed it. I heard the other day about something they did and they voted on all State spending. The same with local schools and other spending and had every item listed so everyone could read and understand what was being voted on. That is the only way to do it but I would bet that this nation does not have the courage to do it.
