

# I DON'T BELIEVE IT, DO YOU ALL?

**THIS IS THE THIRD AND FINAL PART OF MY TIRADE ABOUT SOME THINGS I WAS A THINKING ABOUT KIND OF STRONG LIKE.**

This part is directed mostly toward people living in Louisiana. Others may have similar situations in their Health Care, but good ole crooked Louisiana built in a health care system years ago and it still works. The current body of Congressional Dumbs and the Dumber President Obama who also tells lies and I have never trusted a person that lies, would not be interested in a Health Care System that works. The President seeks to fundamentally change America because His Czars have the plan ready and are not even concerned with up grading Americas Health of its people.

Louisiana has a Charity Hospital system that compares with the private Hospitals in the state. I live about 35 miles from Monroe La. And that city has two modern Private Hospitals and one modern Charity Hospital. True, many interns work towards their MD at the Charity but they are taught by the same Doctors in many cases that use the private Hospitals for the care of their patients. Even in the Fifties and before that, there were Hospitals and Sanitariums in small towns with a few Charity Beds for those waiting transportation to the nearest Charity Hospital. There was at least one Charity Hospital in each of the larger towns or cities available for those who could not buy insurance. **WHY DOESN'T SOME SMART LOUISIANA POLITICIAN COME UP WITH A SIMILAR NATIONAL PLAN FOR THE WHOLE COUNTRY?**

By the way, Mr. President we started off with a Democratic Republic form of Government but with the political deals made to select Mr. Eisenhower a Republican (He had never played much civilian politics) so to make ex Governor Warren of California Chief Justice of the Supreme Court and keep him happy the political deals were made, among them Federal Aid to The States Public Schools. It was not a lot members of Congress said but see where it is today, one of the biggest Entitlement Programs on the Federal level. Why it has its own Cabinet Member now. **Mr. Beck** do not blame Obama with all the present problems, start with the beginnings. I believe that President Carter was a big screw up and President Bush the first was to bail out big financial firms (remember the savings and loan) mess. Then along came Ole Bill and dealt all His cards under the table, and got people

arguing with what to do with Him when the girlee thing came to light. Several of our last Presidents had a lot to do with changing a little bit of the Democratic Republic originally designed for America. But did not the first of two major political schemes start then? Look it up in an old History Book. You might have to go to a rural Southern History Book to get the entire story. But it makes for interesting reading.

WELL THAT IS ENOUGH OF A TIRADE TO DO FOR NOW. THIS IS THE END OF PART THREE AND IF YOU DID NOT READ THE FIRST TWO PARTS UNDER SPECIAL WRITINGS YOU MIGHT WANT TO GO BACK AND READ THEM. IF YOU DON'T THAT IS FINE WITH ME.
