

The best job in the U.S.A

Some think the best jobs are President of some big company. I say the best are the members of the State Legislature and the members of Congress. The first little article submitted for your judgment is members of Congress.

Number one: They receive an automatic pay raise each year. Yes each year without any one in the whole U, Soft A even voting, Rather than giving each "perk" here goes with some free or reduced items. Haircuts, insurance, (what about just giving each American citizen the same buy on insurance? Would some of the fishers for men answer that question? Home by plane on weekends. That is each weekend. Work week of four days. What a strain it must have been to have to work on that crazy mixed up so called "Health plan". I will not go on and on about so many free and near free "perks". After all the voters issued them out. We should not be sorry for our actions should we?
